Tips for engaging someone who we know is diagnosed with autism spectrum disorder?

1- **Assume nothing** - regardless of appearance, tone of voice (or lack thereof) - don’t give up - EVERYONE has a unique pathway for engagement.

2- **Ask questions** - use their name and make sure that your questions are with as much clarity as possible (to limit any misinterpretation). Be mindful of rapid-fire questions.

3- **Read social cues** - Do not assume a non-response is someone who cannot comprehend. If unable to engage, seek out the individual's preferred method of engagement. This will help determine if the individual is over-anxious or overwhelmed.

4- **Be an active listener** - what can we pick up from the individual's responses? Is direct communication difficult, and if so, what alternative ways might be suggested?
